

Why?

- Depleted O&G fields are being decommissioned
- Substantial costs savings could result from re-using existing wells
- no procedures in place

What?

- Provide knowledge and procedures for re-using wells
- Explore the regulatory and social framework for re-using wells

How?

- Develop a screening tool
- Validate procedures on national case studies
- Competent and dedicated consortium

Re-use existing wells for CO₂ storage – economical and reliable

This project has received funding from ADEME (FR), RVO (NL), RCN/Gassnova (NO), UEFISCDI (RO), BEIS (UK), and DOE (USA), within the Horizon 2020 programme ACT, Project No. 299681.
