

20 February 2023

ANNOUNCEMENT

EVENT

ON GEOLOGICAL STORAGE OF CARBON DIOXIDE - CO₂

The Centre for Renewable Energy Sources and Saving (CRES) organizes on **Wednesday, 1 March 2023** in the morning (hours 9:30-14:30 EET), event with title «**Sequestration, Transport, Geological Storage and Use of CO₂**». The event is organized in the framework of the project **ACT-DigiMon «Digital Monitoring of CO₂ storage projects**» and will be held with physical presence at the **Cultural Centre of the University of Athens «Kostis Palamas»**, Lecture Hall, **Akadimias 48 and Sina, 105 62 Athens, Greece**.

During the event, geophysical monitoring technologies for stored CO₂ will be presented, including use of fibre optics for seismic measurements, as well as state-of-the-art industrial applications and present status of CO₂ capture, transport and geological storage in Greece and other European countries. All presentations will be in Greek.

The event is addressed to representatives of energy intensive industries and hydrocarbons producers, and interested professionals (engineers, earth scientists, geophysicists, etc.), regulatory authorities, policy makers, the academic and research community and general public.

Participation is free. For pre-registration please send email to pmavro@cres.gr until 22.02.2023. Participation certificates will be provided.
